 } December, for 0.89 ins. Read 0.49 ins.

Southern Division. East Prospect Year. For 2.72 ins. Read 2.73 ins.

METEOROLOGICAL—JAMAICA.

[CLIMATIC CONDITIONS, YEAR, 1924.]

PRECIPITATION.

January. The Mean Rainfall, compared with the 50 year average, was very deficient throughout, being only about one-third of the average. All the Divisions suffered. The West-central had 54 per cent. of the average, but the North-eastern, Northern and Southern Divisions had only 30, 40, and 43 per cent., respectively, of theirs. The greatest precipitation appears to have been towards the end of the first and second weeks. The greatest total fall for the month was 9.27 ins. at St. Ann's Bay, and Maggotty had the greatest fall in 24 hours of 3.50 ins., on 7th.

February. The Mean Rainfall was slightly under the average, being 91 per cent. of same. The North-eastern and West-central Divisions had 75 per cent. and 96 per cent., respectively, of their averages; while the Northern and Southern Divisions had, respectively, 7 and 6 per cent. over theirs. Most of the rainfall appears to have occurred during the first and last weeks of the month. The greatest fall for the month was 13.24 ins. at Moore Town in Portland, and the greatest fall in 24 hours was 4.95 ins. at Port Antonio on 12th.

March. The Island rainfall was deficient, being only 44 per cent. of the average. The Northern Division had 57 per cent. of the average, and the West-Central about 50 per cent. but the North-eastern and Southern Divisions had only 34 and 44 per cent., respectively, of theirs. The greatest fall for the month was 8.30 ins. at Lennox in Portland, and the greatest fall in 24 hours was 5.15 ins., on the 2nd at the same place. Most of the rain appears to have fallen about the 3rd and 11th.

April. The Mean Rainfall was slightly over one-half the average, and deficient. The North-eastern and Northern Divisions had less than half, and the West-central and Southern Divisions about 60 per cent. of their averages. The heaviest fall for the month was 11.69 ins., at Mocho in St. James, and the greatest in 24 hours was 4.50 ins., on the 21st at Bluefields in Westmoreland. No rain fell at 5 stations.

May. The Mean Rainfall was approximately two-thirds of the average. The West-central division, however, had slightly over the average. The Northern Division had a little more than half, and the North-eastern and Southern Divisions less than half their averages. The May Seasons, although deficient gave a rainfall fairly well distributed. The mean number of rainy days being 10 for the Island. The heaviest rainfall for the month was 30.28 ins., at Bethel Town, and the greatest in 24 hours was 5.40 ins. at Wallingford on 28th, both in the West-central Division.

June. The Mean Rainfall for the Island again shews a deficiency, being slightly over two-thirds of the average. The West-central Division had very little less than its average. The Northern and Southern Divisions approximately two-thirds of theirs, but the North-eastern Division had less than one-half its average. The average number of rainy days was 9 for the Island. The heaviest fall for the month was 24.29 ins. at Little London in the Southern Division, and the greatest fall in 24 hours was 5.10 ins., on the 3rd. at Guy's Hill in the North-east Division. The greatest precipitation appears to have taken place during the first fortnight with a marked preponderance on 14th. For the half year the total rainfall was 19.56 ins., as against a total average of 31.91 ins.

July. The Mean rainfall was slightly over the average. The North-eastern Division had, however, a little less than its average, but the other Divisions had more than their averages. The rainfall was well distributed, giving a mean of 10 rainy days for the Island. The greatest fall for the month was 20.98 ins., at Millbank in the North-eastern Division, and the heaviest fall in 24 hours was 5.23 ins. at Priestman's River, also in the North-eastern Division on the 11th.

August. The Mean Rainfall was very little less than the average. The North-eastern Division had somewhat less than its average. The Northern Division had slightly under its average, while the West-central and Southern Divisions had more than the averages. Rain fell at all stations and well distributed. The mean number of rainy days for the Island being 12. The greatest precipitation occurred about the 14th. The greatest fall for the month was 18.31 ins., at Darliston in the West-Central Division, and the heaviest fall in 24 hours was 4.67 at Mount Holstein in the North-eastern Division.

September. The Mean Rainfall for the Island was more than 50 per cent. above the average and considerably exceeded in all the Divisions, particularly in the Southern Division, which had 12.26 ins. or very nearly twice its average. The mean number of rainy days being 18 for the Island. The greatest fall for the month was 33.09 ins., at Cedar Valley in the North-eastern Division, and the heaviest fall in 24 hours was 7.60 ins., at Southfield in the Southern Division on the 15th.

October. The mean rainfall for the Island was again above the average which was exceeded in all the Divisions, especially in the West-central Division, which had nearly 50 per cent. above the average. The rainfall was well distributed throughout. The mean number of rainy days being 17. Most of the rain appears to have fallen during the second and third weeks of the month with a marked preponderance on the 16th. The greatest fall for the month was 31.41 ins., at Bethel Town in the West-central Division, and the heaviest fall in 24 hours was 8.86 ins., at Mount Holstein in the North-eastern Division on 31st.

November. The Mean Rainfall for the month was considerably above the average. The West Central Division had, approximately, the average, but the other three Divisions had nearly double their average. The mean number of rainy days for the Island was 15. Very heavy rains fell during the first week of the month, and especially on the 7th. The greatest fall for the month was 65.14 ins., at Moore Town, in the North-eastern Division, and the heaviest fall in 24 hours was 18.40 ins., at Hall Head in the Southern Division. The Eastern section of the Island had most of the flood rains.

December. The Mean Rainfall for the month was 15 per cent. above the average. The North-eastern and Northern Divisions were, respectively, 36 and 12 per cent. above the averages, but the other two Divisions were somewhat below. The mean number of rainy days for the Island being 9. The wettest days of the month were on the 3rd and 4th. The greatest fall for the month was 42.42 ins., at Pleasant Farm in Portland in the North-eastern Division, and the heaviest fall in 24 hours was 11.16 ins. at Mount

Holstein on the 2nd, in the same Division. For the Island, the total actual fall for the year was 79.28 inches, or just about 4 per cent, above the 50 year average of 76.46 ins. The distribution of the year's rainfall is as follows. The Southern division suffered severely, for only one-half of the possible rain fell for the first 6 months. The Northern Division for the same period, had only 14.21 ins., as against an average of 24.27 ins., or, say, 60 per cent. The West-central was not so badly served, for 31.64 ins., fell as against 38.29 ins. average for the half year. The North-eastern Division had only 20.05 ins., as against a possible 45.19 ins., for the half year. The latter half of the year had, however, plentiful rains; for the months of July, August and December gave about their averages, but September, October and November were somewhat over 60 per cent, above their averages, on the whole each Division in the period had more than the 50 year average.

WEATHER DISTURBANCE.

Weather Disturbances occurred in the West Indies about the 5th February, 20th March, 1st and 18th and 28th August, 14th October and 7th November, but no storm centre passed over the Island during the year. A weather disturbance of moderate intensity, however, passed near north of the Island about 7th November causing flood rains.

NORTHERS.

"Moderate Northers" were experienced in Kingston, in February and March and at Morant Point February, March and November.

HAILSTORMS.

At Santa Cruz in St. Elizabeth, hail fell on 30th July, accompanied by rain and high wind. Hail also fell at Kempshot on 14th July during a thunderstorm.

EARTHQUAKES.

Only a few very slight shocks were noticed in January, March, June, July, August, September and November.

AT KINGSTON.

The total rainfall for the year was 39.19 inches at the Public Works Building, as against the 50 year average of 33.59 ins. The mean temperature for the year was 79.1 degrees as compared with the 33 year average of 78.7 degrees. The highest maximum temperature was 93.3 degrees occurring in the months of May and June. And the lowest minimum 61.1 degrees in March. The mean humidity for the year was 78 per cent. at 7 a.m. and 61 per cent. at 3 p.m. normal being 81 per cent. for 7 a.m. and 66 per cent. for 3 p.m.

J. F. BRENNAN,

Government Meteorologist.

12th February, 1925.
